Acute Case Taking

Categories	Symptom
Aetiology: *When the acute issue began – did something cause it?*	
Condition: *Clearly state out what the condition is to begin.*	
Location: *Be specific. Where is the location of the issue?*	
Sensation(s): *How does that feel? Can you tell me what it feels like? Get detailed and write language down as said.*	
Modalities: *What makes the primary complaint better or worse?*	
Concomitant(s): *Another symptom that is appearing in another part of the body.*
